

**goplasticpallets.com®**  
The Responsible Plastic Pallet Company

## **GoFLC 960 & 980**

Extremely robust  
folding pallet containers

## BENEFITS

1

100% size and strength consistency; its uniform dimensions and weight prevent inconsistencies which can disrupt a production line or warehouse.

2

Its strength is unrivalled when compared with alternatives; it can withstand frequent use in rigorous, closed loop scenarios, in manual and automated systems.

3

Manufactured from black recycled HDPE, low maintenance and easy to clean if required.

4

When not in use the 1200 x 1000mm unit folds down to a compact 317mm, allowing a standard sized truck to transport up to 206 units. The 1200 x 800mm unit folds down to 354mm and allows for 198 to be loaded.

5

Fully recyclable at the end of their working life. Helping to create greener supply chains.

The GoFLC 960 & 980 work flawlessly in automated warehouses and with material handling equipment. The strength, consistency and reliability make this folding box the perfect companion to high-end systems.

## FEATURES

### Storage Capacity

Large capacity ideal for storage across multiple sectors, 847 or 625 litres.

### Load Capacity

The GoFLCs boast a high load capacity of up to 900 kilos

### Drop-down Doors
