

A Consistently Strong 1400 Litre,
Automation Ready Box

GoPalletBox 1311S

goplasticpallets.com[®]

The Responsible Plastic Pallet Company

1311S BENEFITS IN AUTOMATION

1

CONSISTENCY

100% size and strength consistency; its uniform dimensions and weight prevent inconsistencies which can disrupt a production line

2

DURABILITY

Its strength is unrivalled when compared with alternatives; it can withstand frequent repeated use in rigorous, closed loop scenarios

3

HYGIENIC

It is non-absorbent and resistant to most chemicals and can be washed repeatedly, removing the risk of contamination

4

SECURITY

Not only can it hold an astonishing 1400 litres, it is available with a secure fitting lid to keep goods safe as they transit through the warehouse

5

RECYCLABLE

If you no longer require the boxes at the end of their working life, we will arrange for them to be recycled free of charge.

If you're operating a precise and efficient automated system it's important to compliment it with the very best equipment. Our 1311S box will work consistently on roller conveyors, improve efficiency and can reduce system downtime. The box offers a simple bulk storage solution and is fully stackable and rackable.

FEATURES

Super Hygienic Material

The material properties give excellent performance in low temperatures.

Lid

Drop on cover lid protects contents and is designed to accommodate additional boxes stacked on top.

Available in Virgin or Recycled Materials

Available in a number of bright colours made from virgin materials or as a high grade recycled material which is usually black in colour.

Label Holder

A label or card can be added for identification purposes.

1400L Volume

Perfect for storage of bulk, loose ingredients and material.

One Piece Construction

Offers excellent strength, with the ability to be stacked several boxes high.

Runners

Available on 3 or 6 base runners for safe storage in racking, as well as aiding tipping by mechanical device.

RFID

An RFID tag can be added for increased security/traceability.

Size: 1300mm x 1150mm x 1250mm

Truck/Trailer qty: 42

Volume: 1400 Litres

Weight: 71kg

Static Load: 7000kg

Racking Load: 1000kg

CASE STUDY: GA PETFOOD PARTNERS

GA Pet Food Partners:

GA ordered 19,750 of the plastic pallet boxes in three different colours; 14,000 in blue for storing finished cooked material, 5,000 in red for storing raw materials and 750 in green for other internal use.

During production each box was fitted with a writable RFID tag to record the source of the ingredients and the batch date of the pet food within the container, which would provide GA's customers with full traceability of all raw ingredients.

Jim Whittingham, Operations Director at GA

"I'm delighted with the service we've received from the team at Goplasticpallets.com. From my initial enquiry, right through to our final delivery."
